J. F. Watkin Speaks At H. S. A. Meeting

Nominations for officers were made at the Home and School Association meeting in the Legion Hall Tuesday evening. The following officers were elected by acclamation: Vice-President, Chris Harsch; representative for Kern district, Emil Ohlhauser; for Garrett district, R.D. Barnes; for Avondale district, W.A. Downe; and for Mosher district, Mrs. Renold Neher. At the June meeting elections will be held for president, secretary-treasurer and a representative for Carbon.

Speaker for the evening was J.F. Watkin, school superintendent for the Drumheller School Division. He spoke on child behavior in relation to home and school, stating that psychologists had developed a modern method of solving child problems. The home, school, playmates and the community were given as the major influences affecting the heredity of a child. Mr. Watkin followed his address with colored slides illustrating the many points brought out in his talk.

Farmers Meeting Saturday

The Farmers' Union, Carbon Local, is sponsoring a general meeting in the Carbon Scout Hall Saturday, May 12, at 8:00 p.m. The subject is that of sending a mass delegation to Ottawa to demand the full 25c per bushel payment, revision of the International Wheat Agreement and a Royal Investigation into costs of growing wheat in Canada and how much the government should pay farmers under the recent five-year pool. A vote will be taken on this matter and all farmers, members and non-members are urged to attend.

Farmers, these matters concern your bankroll, and if you are interested in trying to get ahead then you should attend this meeting as it concerns your interests.

HI-SCHOOL HI-LITES

Playing their first league baseball game at Swalwell on Monday evening, May 7, our own beloved Carbon Coal Diggers downed the home team by a 14-7 score.

A Carbon Students' Union party was held at Grand Forks ball diamond Monday, May 7. The party was one of the best yet and our only regret is that not all could attend. You really missed something — we had a lot of fun.

To the people living in and around Carbon, hear our plea! But first think about this: what would you do without young people in this town? Just think of all the enjoyment you get from memories recalled when you see us do something absurd. You think of all the absurd things you did (and don't say you didn't do any) and you

An Increase In Traffic

WITH THE COMING OF SPRING there is a consequent increase in motor traffic on Canadian highways. The number of cars and trucks has grown rapidly in the past twenty-five years, and demands for more, and better roads have become familiar in almost all parts of the country. In 1905 only 565 motor vehicles were registered in Canada. This figure grew steadily, however, and by 1925 it had reached 725,000. In 1948 there were 2,035,352 vehicles registered including 1,497,409 passenger cars and 49,736 trucks. New motor vehicles manufactured in the same year added 152,336 new passenger cars and 77,153 trucks and commercial vehicles to these numbers.

More Traffic On The Roads

This rapid increase in the number of cars and trucks necessitated the building of many roads, but it has been difficult for governments and municipalities to keep pace with the demands for improved highways. In 1944 Canada had a total of 140,540 miles of surfaced roads of which there were 11,542 miles in Saskatchewan, 894 in Manitoba and 10,204 in Alberta. The mileage was greater in Ontario and Quebec, where greater concentrations of population provide more traffic, and more funds for highway construction. However, the ownership of cars and trucks in rural areas in Canada is also great. At the time of the last census there was one motor vehicle for every 1.8 farms and no doubt this ratio will be higher when the results of this year's census are known.

Tragic Number Of Accidents

The tragic number of highway accidents in Canada each year are related to the increase in the number of cars and trucks on the roads and to some extent on the condition of the roads. In spite of the precautions which are taken in marking highways and of supervising the condition of cars allowed on the roads and the qualifications of drivers, the number of traffic accidents remain high. In 1948 there were 74,738 traffic accidents and 2,000 people died as the result of motor accidents. Property damage due to the same cause totalled \$10,468,959. No doubt narrow roads, congestion of traffic and other defects in the highways cause some of these accidents, but many are also caused by carelessness and lack of good judgment on the part of those involved in the mishap. It is to be hoped that in the season which has just commenced, there will be a minimum number of accidents on Canadian highways.

Fashions

Toddler Outfit

4524
SIZES
1-5 yrs.

Anne Adams

Now that she can run and play, you want these adorables for her! A precious little scalloped dress has wings or puff-sleeves. Sunsuit has let-down seat, is cut in one piece. Bonnet is one piece, too.

Pattern 4524 comes in Toddler sizes 1, 2, 3, 4, 5. Size 2 dress takes 1½ yards 35-inch fabric.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions. Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

CARE OF FEET

Take care of your feet. They should be bathed every day and dried thoroughly, and footwear should be changed regularly. Never allow the feet to stay wet from perspiration.

Funny and Otherwise

Smith: "I've got a little attachment here for your wireless."

Neighbour: "Thanks very much. Let's have a look at it; I'm always interested in something new."

"Well, it's a brick and a yard of rope, and the river's the second turning on the right."

"This car is absolutely the last word, sir."

"Well, that should suit my wife. If there's anything she loves, it's the last word."

Schoolboy (writing essay on Nature): "Nature is wonderful—a million years ago she didn't know we were going to wear spectacles, yet look at the way she had our ears all ready."

The rather-diffident young suitor had been meeting her family.

"Now let me see—" he said, trying to get them straight. "Nellie is your oldest sister. Who comes after her?"

"Nobody's come yet," piped up little brother helpfully, "but Pa says the first that does can have her."

Paratroop recruits were up for their first drop. As the last man moved forward to jump, the N.C.O. in charge shouted in horror: "Stop! stop! You're not wearing a parachute."

"That's all right sarge," said the recruit. "We're only practicing, aren't we?"

The Negro parson had gathered his flock to pray for rain. From the pulpit he gazed sadly upon his congregation.

"The faith of some of you is deplorable," he said. "Here, we is, gathered together to pray for rain, and not one of you has brought an umbrella."

"Is your wife artistic?"

"Artistic! Why, she's so artistic that she doesn't care how the soup tastes so long as it's a pretty color."

Increase Seen In Prairie Wheat Acreage

An increase in wheat acreage of 247,700 acres will bring the prairie total this year to 26,083,700, according to the first crop reports of the season.

The reports issued by Canadian Pacific and Canadian National railways showed Manitoba wheat acreage would be up seven per cent. at 2,548,700 acres, Saskatchewan's up 5 per cent. at 16,284,000 acres and Alberta's acreage unchanged.

Moisture conditions across the prairies are considered generally satisfactory and range from "very satisfactory" in Manitoba to "fair to favorable" in the two remaining provinces.

According to the railway reports, fall and winter precipitation was 42.8 per cent. above normal in Saskatchewan and 27.1 per cent. above normal in Alberta. Precipitation in Manitoba was 11.8 per cent. below normal, but surface moisture is ample without being excessive as in many areas last year.

The average life of a dollar bill is about nine months.

Holstein Cow Leads Milk Production

TORONTO. — A 17-year-old Holstein cow, Mina Fayne Korndyke, has produced more milk than any other living cow in Canada.

Owned by J. H. Jose and Sons of Newcastle, Ont., Mina just completed her 13th performance test, giving her a lifetime total of 187,446 pounds of milk and 7,035 pounds of fat with an average test of 3.75 per cent. but-terfat.

Her owners have been awarded a gold seal certificate of longtime production by the Holstein Friesian association of Canada.

To Feel Right — Eat Right

FARMER GROUP TO MEET IN JUNE

WINNIPEG.—The Manitoba Farmers' Protective Association will hold a two-day convention at Brandon in June, provincial directors have decided.

Bruce MacKenzie, president, said the question to be put as a plebiscite to Manitoba farmers this fall is a "cheap trick". Farmers will be asked if they favor marketing of coarse grains as under the compulsory wheat board. If they don't Manitoba will kill the Act making it compulsory to sell through the board.

Red-dyed hair was a fad among ancient Romans.

National Hockey League All-Stars

Red Kelly And Milt Schmidt Top All Players In Points

MONTREAL.—Detroit Red Wings and Boston Bruins failed to make the Stanley Cup finals but they certainly dominated the 1950-51 National Hockey League All-Star Team. Between them they contributed all six players to this year's squad. Four players from Detroit and two from Boston were named to berths on the select sextet.

Gordie Howe of Detroit finally unseated Canadiens' Maurice Richard as right wing on the team after Richard had held down the post for six consecutive seasons. Milt Schmidt, 33-year-old captain of the Boston Bruins and a veteran of 12 N.H.L. campaigns, made the League's All-Star Team for the second time in his career. Schmidt made the center spot. As a matter of fact Schmidt and Defenseman Red Kelly were the only two unanimous selections on this year's aggregation. Other Detroit players to make the team besides Howe and Kelly were Terry Sawchuk in goal and Ted Lindsay at left wing. Defenseman Bill Quackenbush was the other Boston player to gain top rating.

Following is the 1950-51 N.H.L. First and Second All-Star Teams with the number of points compiled by each player:

First Team

Terry Sawchuk, Detroit (70), goal.
Red Kelly, Detroit (90), defense.
Bill Quackenbush, Boston (68), defense.
Milt Schmidt, Boston (90), center.
Gordie Howe, Detroit (81), R. wing.
Ted Lindsay, Detroit (86), L. wing.

Second Team

Chuck Rayner, Rangers (40), goal.
Jim Thomson, Toronto (62), defense.
Leo Reise, Detroit (50), defense.
Ted Kennedy, Toronto (35), center.
Sid Abel, Detroit (35), center, tie.
Maurice Richard, Canadiens (63), R. wing.

Sid Smith, Toronto (33), L. wing.
The 1950-51 N.H.L. All-Stars were picked by hockey writers and broadcasters in the six League cities. Eighteen ballots were sent into League Headquarters, three from each city. Points were awarded on the basis of five points for a first choice, three for a second and one for a third. A unanimous choice polled 90 points. Each member of the First Team is the recipient of \$1,000 from the N.H.L., while each member of the second squad receives \$500.

Terry Sawchuk, rookie Detroit goalie, was named to that position on each of the 18 ballots. He was the first choice of 10, second choice of six and the third choice of two. His 70 points were 30 more than his closest rival, Chuck Rayner of New York Rangers. Rayner was named on 14 of the 18 ballots. He had five first-choices, three seconds and six third-choices. Al Rollins, Toronto Maple Leafs' rookie goaltender, was the only other netminder to garner a sizeable number of points. Rollins polled 36 points.

Red Kelly, Bill Quackenbush, Jimmy Thomson of Toronto and Leo Reise of Detroit stood head and shoulders over the rest of the defensemen in the balloting. The rest of the rearguards weren't even close in the voting. Kelly, the red-headed Irishman, was the first choice on all 18 ballots and he had a perfect score of 90. Quackenbush was the first choice of nine, the second choice of seven and the third pick of two. His

total of 68 points was six more than polled by Thomson. The Toronto defender had eight firsts, six seconds and four thirds. Detroit's Leo Reise partnered Thomson on the Second Team. Reise polled 50 points. He had 16 second-place selections and two third-place choices.

Milt Schmidt was the first choice on all 18 ballots for the center position, while Ted Kennedy of Toronto and Sid Abel of Detroit ended up in a dead heat for the Second Team. Kennedy and Abel each had nine second-choice votes and eight thirds for a total of 35 points. Max Bentley of Toronto was the only other player to receive any recognition at center and he polled two third-place votes.

Gordie Howe moved up to the First Team this year after holding down the right wing berth on the Second Team for the last two years. He polled 81 points to Richard's 63. It was strictly a two-man battle for right wing honors. Ted Sloan of Toronto was an automatic third choice on all 18 ballots. Howe was the first choice on 13 ballots, while Richard was the first choice of four. They split one first-place selection.

Seven players earned points in the balloting for left wing but only three were considered seriously. Ted Lindsay made the First Team handily when he amassed 86 points, but the voting was closest for the second squad where Sid Smith of Toronto nosed out Chicago's Roy Conacher by a single point, 33 to 32. Lindsay, the peppery Detroit wingman who is the only repeater from last year's First Team, had 17 first-place votes and one third selection for 86 points. Smith was the second choice of nine, and the third choice of six which gave him a point total of 33. Conacher polled one first, eight seconds and three thirds for his 32 points.

This is the first N.H.L. All-Star Team for rookie Terry Sawchuk, and it's the first time that Red Kelly and Gordie Howe made the First Team. Both were members of the Second Team a year ago. It marks the third time Bill Quackenbush has gained a spot on the First Team. He was awarded a defense post in 1947-48 and 1948-49 while a member of the Detroit Red Wings. Ted Lindsay is the only other three-time performer on this star-studded six.

Three members of the Second Team, Goalie Chuck Rayner, Defenseman Leo Reise and Center Ted Kennedy, held down the same positions on the second sextet a year ago. This is the first time that Toronto's Jim Thomson and Sid Smith have earned All-Star recognition. Sid Abel and Maurice Richard, other members of the Second Team this year held down positions on the First Team in 1950.

Average age of the 1950-51 N.H.L. All-Star Team is an even 26 years. Milt Schmidt is the oldest at 33 while Terry Sawchuk is the youngest at 22. Kelly is 24, Quackenbush is 29, Lindsay is 25 and Howe is 23. Schmidt is the only player on the team who is married.

Woman Is Executive Of The Home

NEW YORK.—Any woman who says demurely, "I'm just a housewife," is too modest, Leone Ann Heuer believes.

Miss Heuer has been advising families out of financial predicaments for years, as the director of consumer education for the Household Finance Corp. Budgeting, usually a grim subject, is a lively topic to her, even when she's on a trip away from her Chicago office.

"Most people start a budget and then give up after a few weeks," she commented. "They don't realize that no budget is fun to get started, but if you stick at it long enough it gets to be habit."

Those old rules about one-fourth of the income for rent, a certain percentage for food, and 10 per cent. in the savings account might as well be thrown out the window, she added firmly. With today's prices, one family in a thousand could crowd their needs into these rigid columns.

"First figure out what is essential to your family, then list the things you'd like to have," Miss Heuer explained. In the "Your Budget" booklet recently published by her corporation, a wish list is provided, with three sections, for things you want soon, those you want during the next year, and wishes for the future.

"Just take for an example a woman who gets a big kick out of browsing around stores and occasionally picking up something for her home or her wardrobe," Miss Heuer said. "This impulse buying is the biggest danger to family budgeting, yet take away from her enjoyment of life if you force her to stop entirely. This woman could plan to use some of her reserve fund in the budget for occasional shopping trips."

Saving just for the sake of stacking away money doesn't impress the budget expert. She insisted that each family should save according to the wish list, plus its own estimates of old age security.

Women, she's concluded, do most of the budget planning, and often run into a great deal of resistance from husbands who think it's too much trouble. Unless the man of the house and the kiddies get into the act, however, Miss Heuer admitted that a budget was useless.

"Give the husband an allowance, like everybody else in the family, then don't make him account for a penny of it," she said.

Fish Catch Value High

VANCOUVER.—British Columbia's 1950 fish catch had a total market value of \$68,904,000, the highest in history, A. J. Whitmore, federal fisheries supervisor, reports. Last year's operation was \$10,000,000 higher than the record year of 1947.

28 PER CENT. SAFER

The dark hours are 28 per cent. safer than daylight in respect to total number of traffic accidents.

Disputed Passage

To Impregnate Mosquitoes With Radioactive Phosphorus

Scientists Hope To Obtain Information Helpful In Controlling Pests

FORT CHURCHILL, Man. — Mosquitoes will be impregnated with radioactive phosphorus this summer. Then scientists from this northern military camp will trail them with Geiger counters. The scientists, from the staff of the defence research board, hope to obtain information helpful in controlling the pest in populated areas.

It is not new. For the last two summers Canadian and American entomologists have used this method to check migration of mosquitoes from their breeding grounds.

"Further work is anticipated," said Bill Beckel, an official of the research board.

Radioactive phosphorus is sprayed in ponds and it stays with the mosquito from egg to adult stage. Millions of mosquitoes are later caught by net near Fort Churchill.

The mosquitoes are killed, spread over a table, scanned with a Geiger counter. Those which react are then known to have come from the sprayed area.

"We may know the distance it is necessary to control the mosquitoes

from the camp," Mr. Beckel said.

Right now his job is to establish a colony of northern mosquitoes at the laboratory and observe their behavior. Guinea pigs will be used for their "blood meals".

For although a mosquito is a plant feeder to a great extent, said Mr. Beckel, it seeks blood in preference to nectar and plant juices.

"The majority of northern mosquitoes must have blood to produce fertile eggs. Only the female mosquitoes go after blood."

A blood meal lasts a mosquito about three days and, contrary to popular belief, she doesn't die after one helping.

Mr. Beckel says the black fly is a worse villain than the mosquito.

"He doesn't pierce. He literally tears a chunk out of you with his teeth."

Cancer Ranks Second As Death Cause

Cancer, killer of more than 17,000 Canadians last year ranks second to heart disease as a cause of death. Where does it stand as a cause of human suffering?

No one has ever rated diseases by the misery they cause, but everyone recognizes the dreadful impact of cancer in cases that cannot be cured. Here is a disease that reaches beyond the patient to his family and his community.

Months of care and treatment, heavy expenses, the sight of pain and need create cruel problems. The patient and all those near him share a heavy burden.

That is why the Canadian Cancer Society describes the campaign as a fight against cancer. That is why Canadian Cancer Society volunteers conduct fund-raising and educational campaigns with such zeal.

Just as anyone may develop cancer so everyone can play a part in the fight against it—in the 1951 campaign. Your dollars help guard your family. Give to conquer cancer.

Extensive Tree Planting Campaign In Southwest Sask.

SWIFT CURRENT.—Agricultural district No. 9 is embarking on an extensive tree planting campaign in southwestern Saskatchewan this year, which will include 77,550 trees to be shipped into the district adjacent to Swift Current.

Most extensive planter of trees in any one locality will be R. J. Muri, of Hallonquist, who plans to start 11,100 trees this year.

Neville will be receiving 14,000 trees shortly; 13,000 will go to Wyndmark; 12,000 to Hallonquist, and 9,000 to Swift Current.

The majority of the trees will be caraganas, Mr. Collinca said, and will be used both as shelter belts, and for roadside planting.

TRY AND STOP ME!

By BENNETT CREEP

The warden was showing his domain to a prominent lady columnist. They passed through one room where two women were sewing. The columnist whispered, "What evil-looking females! What are they in for?" The warden froze and replied, "They are here because they have no other home. That is our private parlor, and the females happen to be my wife and mother-in-law."

One team lost points deservedly on this hand in the 1948 European Championships. In Room 1 North pushed a good principle too far with a response of One Spade to South's One Heart. East made a trap pass, South bid Two Hearts and North squirmed back to Two Spades, which East doubled. South persisted with Three Hearts doubled by West for a penalty of 800.

In Room 2 North passed, and South's One Heart was doubled by East. West made a penalty pass, and North now bid One Spade, doubled by East. South found a place of refuge in Two Diamonds, which was also doubled. East won the opening lead of ♠ 2 with ♠ A and played ♠ A followed by ♠ 3, but South escaped with a loss of 200 points only.

On The Side : E. V. Durling

It was Byron who said: "Revenge is sweet, especially to women." As a young woman, Sarah Hyslop of London was humiliated by having her bridegroom fail to show up at the church for the wedding. She was in the same tragic and embarrassing situation as the young woman in Vesta Victoria's song, "Waiting at the Church". Following this experience, Sarah became an enemy of all men. She decided to be revenged on the male sex in general for the way one man had treated her. So she accepted the marriage proposals of many men, joined them in arrangements for a wedding and then failed to show up at the church. In all, Sarah left fifty-three different men waiting at the church!

Responsibility For High Shoes

As I previously reported, high-heeled shoes were first worn by men. King Louis XIV of France, or maybe it was Louis XV, was a short man. He was attracted by a statuesque blonde. He longed to be taller than she was. So the court bootmaker figured out the idea of high heels for his majesty. Then when the women of the court saw what high heels did for the king's height, they decided to try them. The shoe which conceals the height building part is a comparatively recent invention. Its originator, Jesse Adler, was a very short man. He once asked a tall brunette to dance with him. The lengthy lady looked down at Jesse and then, kicking off her high-heeled shoes, said: "All right, let's go!" This experience so humiliated Mr. Adler that he decided to do something about increasing his height. So he originated the so-called "elevator shoe".

Furious Pipe Smokers

Pipe smokers generally maintain a calm attitude, but are dynamite when aroused. If your daughter is considering marrying a pipe smoker, have her remember this. Tell her not to stir the old boy up too much. When angry, pipe smokers throw things. The classic warning, "Beware the fury of a patient man," was undoubtedly inspired by a pipe smoker.

Home Managers On Overtime

Maids and cooks are now being paid from \$150 to \$200 a month. Of course, they do no washing and have a five and a half day week. This gives an idea of what the average wife's housework would be worth if she were on salary. As the average wife cooks, cleans, washes, takes care of the kiddies, and works a seven-day week, her salary, were she paid for her home managing efforts, would be about \$100 a week. Of course, I figure on overtime for all time over a forty-hour week. And double time on Sunday.

HERE'S HEALTH

Mary had a hacking cough
The kind that stayed and stayed.
But her mind was put at rest
She had her chest X-rayed.

\$8,000,000 FROM CANADA TO U.N.—Acting for the United Nations organization, U.N. Secretary-General Trygve Lie, (right), thanks John W. Holmes, Canadian permanent representative to the United Nations, after the latter presented Lie with a cheque for \$8,000,000 from the Canadian government. Seven and one-half million is for Korean relief and the remainder is for Israel.—Central Press Canadian.

H.M.C.S. ONTARIO COLLECTS TROPHY—Commodore H. F. Pullen of Oakville, Ont., (left), commanding officer of H.M.C.S. Ontario, is shown above as he receives the Costello Shield from Commander J. P. Mullins, commodore of the Royal Suva Yacht club, during the cruiser's call at Suva, in the Fiji Islands, while en route to Australia. The Ontario's sailors defeated the Suva Yacht club in a regatta, becoming the first challengers to capture the shield since it was put up for competition between the club and visiting ships of the commonwealth 18 years ago.—Central Press Canadian.

IT'S A PREFABRICATED IGLOO—A new type inflated radar dome, which has just been completed for the U.S. air force, is shown in Akron, Ohio. Note the size as compared with the auto and the man. It is made of specially compounded rubber and fiberglass and is 37 feet high. The structure will be used to enclose aircraft warning equipment being installed on Canada's Arctic rim. The "rubber house" is capable of withstanding 120-mile-an-hour winds. The dome measures 54 feet in diameter and requires over 1,200 pounds of rubber and 90 gallons of rubber cement.—Central Press Canadian.

MAKING IT SAFER FOR PEDESTRIANS—A newsreel man in foreground gets a close-up shot as 1,000 charges of explosive are set off to demolish the former general headquarters of the Austrian railways in the heart of Vienna. The building was hit by Allied bombs during the war and was in shaky condition, a constant menace to pedestrians.—Central Press Canadian.

THE RACCOON WON—At the top of the tree is a raccoon and shinnying up in his direction is John Ponezalek, an Italian immigrant who arrived in Lakeview, Ont., recently. John knows something about raccoons now, as the animal managed to cause him to withdraw from the attack with nipped fingers. The raccoon then leisurely escaped.—Central Press Canadian.

A WARM WELCOME FOR WOMAN WHO SAVED HIS LIFE—Miss Claire Phillips, internationally known espionage agent, is seen as she was warmly greeted with a kiss and flowers by Major Kenneth Boggs upon her arrival in New York. Miss Phillips, the only woman in the U.S. to be awarded the medal of freedom upon recommendation of General Douglas MacArthur, operated a night club in Japanese-occupied Manila during the war from which she sent vital information to allies. Maj. Boggs, a survivor of the infamous Bataan Death March, was saved because of such information supplied by Claire who passed as an Italian during escape.—Central Press Canadian.

California's Mojave desert Joshua trees are among the oldest living things.

THE HOLIDAY IS JUST A MEMORY—Like any other holiday, Princess Elizabeth extended her vacation as long as possible before returning home. Here is one of her best "holiday snapshots", taken in Rome just after her 25th birthday luncheon on April 21. Prince Philip, shown with her, remained at his Mediterranean naval post when she returned home.—Central Press Canadian.

WINTER WAS A TOUGH ENEMY—This photo, just released by the British Navy, shows the icy conditions in which the cruiser Kenya maintained her patrol of North Korean waters. The ships and others of the U.N. fleet operated in waters formerly considered unnavigable in winter months.—Central Press Canadian.

WOMEN MINISTERS—These four young pretty women will be ordained ministers of the United Church of Canada upon their graduation from Emmanuel College, Toronto, where they are completing their theological studies. They are, top row; Joan Donaldson of Hamilton, who attended McMaster University, (left); and Jane Bone of Rosetown, Sask., from Victoria University. Bottom row: Jean Preston of Hamilton, from Victoria University, (left); and Kathleen Christopher of Schumacher, Ont., from the University of Western Ontario. Women clergy in the United Church officiate at weddings, baptisms, funerals and give sermons at services. Dean A. D. Matheson of Emmanuel College says the women give promise of being effective members of the clergy.

Subsidies

Alberta Wheat Pool Budget,
April 20, 1951

The turmoil which has been raised in Eastern Canada over the \$65 million federal grant to the Wheat Board to make a final payment of 8.3c a bushel for wheat in the 1945-49 pool, is, and should be, resented in Western Canada. One would think that the western wheat farmers were mendicants and they alone of all classes in Canada received special treatment. That is far from the case.

H. H. Hannam, president of the Canadian Federation of Agriculture, has listed some federal government subsidy payments made to groups and industries other than farmers, in the 1949-50 fiscal year as follows:

Subsidy for Canadian gold mines	\$13,715,778
Subsidy on movement of coal	\$3,919,000
Subsidy on steel and iron	\$4,662,251
For unemployment insurance	\$45,059,583
Subsidy for judges (111) pensions	\$458,937

Then special depreciation on \$514 million invested was allowed war industry during World War II.

The Canadian tariff in itself operates in the nature of a bonus to Canadian industries and is oppressive particularly to people residing in the prairie provinces of Western Canada. In the early 1930's the late Hon. Norman Rogers, minister of labor in the Canadian government, prepared a table showing how each province in Canada was affected by the Dominion's tariff policy.

That table showed that at that time the Canadian tariffs cost the people of Manitoba, Saskatchewan and Alberta \$54,925,000 a year, or an annual average charge of \$23 on every man, woman and child in the three provinces. With the expansion of Canadian industry and western purchasing, the figures may now be doubled.

The table also showed that the provinces of Ontario and Quebec had an annual gain through the tariff of \$837 million.

The \$65 million grant by the federal government to the Wheat Board permits a payment of 4 1-2 cents a bushel on 1,436 million bushels of wheat delivered by the farmers of Western Canada between 1945 and 1949 inclusive. It brings the total payment up to a little over \$1.83 a bushel, basis one Northern at the terminal, on total deliveries.

Between March 1, 1945, and February 17, 1947, the Wheat Board sold 160 million bushels of wheat for domestic consumption at \$1.25 a bushel when the export price was \$1.55. That was a direct subsidy by the wheat producers to Canadian consumers to the extent of \$48 million.

The prairie provinces of Western Canada constitute a land area of 452 million acres, of which 117 million are in occupied farms, 65 million acres being improved lands. This is one of the most productive farming regions in the world.

During the war this area produced nearly 5 1-2 billion bushels of grain, over 5 billion lbs.

of beef, and 8.6 billion lbs. of pork. This production resulted in Canadian people being among the best-fed in the world. and also provided 3.1 billion lbs. of pork and 600 million lbs. of beef for export to Great Britain.

While Canada has experienced a growing industrialism, which strengthens the nation's

economic fabric, agricultural production is still the mainstay of the national economy. The farmers of Western Canada, under the constant risk of drouth, hail and insect pests, have rendered an exceptional contribution to the progress of the Canadian nation. "Without a west" Canada would not be much of a nation.

At Home and Abroad **SERVE CANADA** in the

"Front Lines of Freedom..."

with the **ENGINEERS**

Men of a hundred trades, masters of a thousand problems — serving Canada and Canada's Army in countless ways — the Royal Canadian Engineers are key men in Canada's most important business today... defence.

Working against time to build up our defences, one of Canada's most urgent needs is more men for the Active Force. This fast growing Army of ours needs men with the skills to give our modern Army the power to make things happen fast.

In the Canadian Army many of these skills belong to the Royal Canadian Engineers. They include everything from the Building and Shop Trades, through Surveying and Map Making, to operating all types of equipment. It takes time — a lot of time — to train "Engineers".

Join Now! Learn the skills of the men who must be everywhere in the Canadian Army. We must be ready to defend our homes, our friends — the way we want to live. Join the Royal Canadian Engineers.

TO ENLIST YOU MUST:

1. Be a Canadian citizen or British subject.
2. Be between 17 and 40 years of age.
3. Be single.
4. Meet Army test requirements.
5. Volunteer for service anywhere.

REPORT RIGHT AWAY TO:

What To Do About Fumblitis

A favorite Big League expression to describe poor fielders is "brick hands". The now-he-has-it-now-he-hasn't type of fielder is usually a man who cannot relax his hands and wrists when taking a ball, and as a result it bounces out.

Tight hands cause more errors in baseball and softball than anything else. Complete relaxation of the hands and wrists is something that rarely comes naturally; it has to be learned.

Any of the great infielders such as Lou Boudreau, Marty Marion, Eddie Joost, Phil Rizzuto or George Starnweiss had to know how to keep their hands "soft" when taking a ground ball. Many professional teams, not only in baseball but in basketball and football, have at one time or another hired Bill Miller, the famous relaxation expert, to teach their players not to tighten up. One of the first things he goes to work on are the hands.

The sooner you become 'hand conscious' the better your chance of becoming a great fielder. The first problem is to gain enough control of the muscles to be able to relax them at will. Here is a simple drill that can be performed any time during the day and also during games or practices.

It consists merely of clenching the hands for a few seconds — not too tightly, just enough to feel the tension — and then relaxing them completely. Let them drop loosely from the wrists. If you do this often enough, in a very few weeks you will have much better control over your fingers and wrists.

Next, learn to concentrate on relaxation during fielding practices.

50-Game Ball Schedule

Western Canada Semi-Pro League Now Finalized

MEDICINE HAT, Alta.—Schedule and major constitution clauses of the six-team, semi-pro Western Canada Baseball league were finalized at a special weekend meeting.

The conference was called by President Cliff N. Henderson of Moose Jaw, Sask. It was attended by delegates from the six member clubs—Regina Caps, Indian Head Rockets, Estevan Maple Leafs, Moose Jaw Canucks, Swift Current Indians and Medicine Hat (California) Mohawks.

The 50-game league schedule opens from May 22 to June 1. Clubs will be allowed any number of registrations prior to Aug. 1, when no more will be permitted.

Each club will be required to post a \$1,000 guarantee and another \$500 apiece for league operation and umpire costs. It is planned to engage three umpires for the full schedule.

On gate receipts, the visiting club gets a \$100 guarantee or 7½ cents for each ticket sold, whichever is greater. The guarantee obtains if a game is rained out. But the postponed game must be played as part of a doubleheader on the next return visit without guarantee for the one game.

KITCHEN MEDITATIONS

By JANE DALE

CLEAN WINDOWS

We took the storm sashes off today. Then washed the grime and dust away.

We made each glass so shiny bright. They seemed to let in far more light.

Each window is like a picture rare. Revealing earth's beauty everywhere. The grasses green and the budding trees;

And birds winging against the breeze.

A neighbor's house or a distant spire. Or the setting sun like a ball of fire. The world is out there for us to see. Through windows clean as clean can be.

Maltese Labor May Be Imported

EDMONTON. — Plans are being made to bring several thousand Maltese workers to Canada to help reduce the labor shortage in the agriculture and forestry industries, Fred Newcombe of Edmonton, secretary of the federal-provincial farm labor committee, says.

Special work should be done with a tennis ball. It is so light and has so much bounce that it will slip away from you if you are not relaxed. Throw it against a wall or use it in fielding workouts with your pals or teammates. Your hands must be relaxed and should 'give' when taking the ball.

Practice this 'give' with the ball during workouts with the regulation ball. Remember this: If you feel that ball smack against your hands, you are not relaxed enough. Treat every one as though someone were throwing an egg at you.

Keeping the hands relaxed is apparently a minor thing. In reality, it isn't; it is important enough to gain the big league nickname of "brick hands" for those who haven't got it.

Because it seems such a small point, however, it is more often overlooked than any other fundamental. Make up your mind to become hand conscious in your fielding; all your coach's tips on position, strategy and throwing will be useless if you can't hang on to the ball.

A letter to "Sports College, Box 99, Toronto 1, Ontario" will make you a member of the largest coaching service in the world. Membership is free. Available through the College are specially prepared instruction books covering virtually every sport.

Listen to Sports College on the radio every Saturday afternoon, when famous athletes give inside tips on how they play. The program is carried by the C.B.C. Look up time and station in your area.

IF UPSET OR SWAMPED
HANG ON
DON'T LEAVE BOAT
SPACE PASSENGERS EQUALLY ALONG THE SIDES
DISTRIBUTED BY CANADIAN RED CROSS
IN THE INTERESTS OF WATER SAFETY

HANG ON TRANSFERS

Free water proof transfers, as illustrated for affixing to boats or canoes, may be obtained from the Red Cross Water Safety Division, 2331 Victoria Avenue, Regina.

Every boat owner is asked to help in the campaign to prevent drownings occurring as a result of boating accidents, by sending in their name, address, and number of transfers desired.

The transfer is best placed on the centre seat of the boat close to the side. The spot chosen should be cleaned. Directions are supplied with each transfer. If a really permanent job is desired, a coat of clear varnish can be applied over the transfer.

If every person who steps into a row boat, sail boat, motor boat, or canoe of wood construction, realized that in the event of an upset the boat will likely fill with water, and settle low in the water, but it is still capable of supporting all its passengers if they will slip into the water and quietly hold on to the boat. The passengers will have to balance the craft by spacing themselves evenly around the boat. No effort should be made to climb up on the boat as this may cause it to roll and certainly will push it further under water. Of course, non-swimmers are very unwise to go out in any small craft unless they wear a reliable life jacket.

Every boat should be equipped with some sort of life buoy and an efficient, no cost type can be made by tying an airtight gallon can to each end of a 2 foot length of ¼ inch rope. Any type of one gallon cans will be found suitable. Keep one of these buoys in the bow and one under the stern seat.

WILL OBSERVE THURSDAY

WINNIPEG.—Thursday, May 24th, will be observed in Manitoba as Victoria Day, announces Hon. C. E. Greenlay, provincial secretary and minister of labor. "Several enquiries have been received as to whether or not Victoria Day should be observed on the following Monday," the minister stated. "Any change such as this would involve the passage of legislation by the federal parliament and no such legislation has as yet been introduced," he explained.

Weekly Tip

BURNT UTENSILS

When a pot of food starts to burn, set it immediately in a pan of cold water, remove contents to another pot and there will be no trace of burning.

THIS CURIOUS WORLD

By WILLIAM FERGUSON

KWIZ KORNER

CAN YOU SPELL THE FULL NAME OF THE FISH COMMONLY CALLED A MUSKIE?

THE STAR ALGOL NOT ONLY TWINKLES, BUT WINKS! EACH WINK, CAUSED BY PARTIAL ECLIPSE BY A COMPANION STAR, LASTS TEN HOURS.

ANSWER: Webster's dictionary gives muskellunge as the preferred spelling, but muskallonge and muskallunge also are correct.

PRISCILLA'S POP—Remember?

World Happenings Briefly Told

The Pakistan government has decided to buy nine more helicopters, making a fleet of 12 to be used in fighting locusts and plant pestilence.

Large numbers of caribou are reported beginning their seasonal trek back to the northern barren lands from near Churchill, Man.

Deep underground air-raid shelters are included in plans being drawn up for the rebuilding of areas in Plymouth, England, damaged in the air raids of the last war.

A local woman spent two weeks on cleaning 7,000 square feet of the parish church in Illogan, Cornwall, England. She did it as a token of thanksgiving for getting a new house.

To raise money for his church a priest at Swansea, Wales, appealed to his congregation for old woollen socks. The material can be sold at good prices in view of present wool stock-piling.

American Buyers Purchase Manitoba Pigs

BRANDON, Man.—Interest in the swine industry in this area has sharpened recently with inquiries being made by many outside buyers. Mr. Malcolm McGregor reported that he is shipping two young pigs to American buyers. Both animals are nine weeks old, and one of them will go to E. S. Kellogg and Sons of Clear Lake, Iowa, and the other to G. W. Hughes of Madison, Alabama.

Prairie Farmers Look For Less Grasshopper Trouble

Indications Show Cycle Heading Downward In 1951

Everybody watches the business cycle, but prairie farmers watch the grasshopper cycle too. They're breathing more easily this year, because the grasshopper cycle seems headed downward in 1951. The hopper forecasters, who work for the Dominion Entomological service, prepare the brightly colored maps seen in post offices throughout the Prairies. Each area is designated as to probable severity of hopper attack.

In Manitoba, the area of infestation forecast is much smaller than last year's. It is mostly confined to the Red River Valley. In Saskatchewan, the area is still extensive, but the severity will be less. The situation is roughly the same in Alberta.

The grasshopper cycle has hit three important peak periods (as well as other infestation years). The first hump in the infestation curve was 1918-23. The second big one was 1932-35. The third one started in 1949, runs through this year. The periods are roughly defined, of course. Damage depends on weather after hatching. Control measures are always more effective with favorable weather.

Grasshoppers are not all of a kind; three types cause most of the damage on the prairies.

Legless Woman Receives House From Builders

CALGARY.—Annie Anderson has a home of her own today—thanks to some friends who have stuck by her for many years, and some other friends she didn't know she had.

Annie lost her legs in a street car accident in 1915. Recently she has been worried because she was going to have to leave the home in which she had stayed since 1932. Two old friends told her not to worry; they would find her a place to stay.

On April 24 Annie left her old lodgings and her friends took her to see what she thought was going to be a suite. Instead she was brought to a new house, and told that it was hers.

She was presented with the house keys by Carl Harstrom, president of the Calgary House Builders' association, whose members had donated the time, materials and labor to build her a place all her own.

Patterns

For All Linens

Alice Brooks

Cross-stitch and filet crochet are perfect together! These motifs are especially easy—just 6 crosses to the inch. Quick too!

Pattern 7270: transfer of 6 cross-stitch motifs 6x8½ to 8x12 inches; crochet chart; directions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.
Be sure to write plainly your Name, Address and Pattern Number.

Just out! Send Twenty-five Cents now for your copy of our new Alice Brooks Needlework Catalogue! Illustrations of crafts and hobbies for all. New crochet, knitting, embroidery and other fascinating handwork. A Free pattern is printed in the book!

The chief villain is the field or migratory grasshopper. This fellow, who gets around more than other grasshoppers which stick closer to their hatching locale, causes the big damage in Alberta and Saskatchewan. The clear wing hopper and the two-striped hopper are the problem in Manitoba. They are found in grasslands, headlands, ditches and roadbanks mostly, whereas the field hopper gets right in the crop. The farmer has to spray or bait right through the crop to get the field hopper. Tillage to plow under hopper eggs is important in field hopper control.

The anti-hopper programs of the farmers, their municipal councils and the provincial governments have done a lot to bring down the 1951 menace: they knocked the hoppers for a loop in large areas predicted for heavy infestation last year.

It costs money to fight grasshoppers: the first year of this cycle \$12 millions worth of materials and supervisors time were used in Saskatchewan alone. That doesn't count the farmers' time. But the same year the hoppers ate an estimated \$29 millions of crop in the province, so curbing of the cycle is worth it.

—The Financial Post.

University Of Man. Leases Oil Rights Of Its Land

WINNIPEG.—The University of Manitoba has leased oil rights on 20,000 acres of its land to the Imperial Oil Co.

The lease calls for a \$1 an acre consideration per year for a 10-year period and 12½ per cent. royalties in case oil is located, revocable at the end of any year by the company.

The deal is the largest "oil possible" land transaction in exploratory oil activities in Manitoba. The land is all west of Portage la Prairie, some in areas where drilling operations are already under way.

DROVE TRACTOR BACKWARDS FOR NINETY MILES

CHURCHILL, Man. — Bill M. Campbell of The Pas, Man., arrived here after driving a caterpillar tractor backwards for 90 miles.

Campbell was in charge of a tractor train taking supplies and diamond drilling equipment to an International Nickel Company development. The largest tractor stripped its gears and would work only in reverse. So Campbell hitched on a couple of sleighs, started out backwards and arrived with only a sore neck after driving two days and two nights.

GEMS OF THOUGHT

HOPE

The natural flights of the human mind are not from pleasure to pleasure, but from hope to hope.

—Samuel Johnson.

Human hope and faith should join in nature's grand harmony, and, if on minor key, make music in the heart.—Mary Baker Eddy.

The good man's hope is laid far—far beyond the sway of tempests, or the furious sweep of mortal desolation.—H. K. White.

As wisdom without courage is futile, even so faith without hope is nothing worth; for hope endures and overcomes misfortune and evil.

—Martin Luther.

It is hope which makes the shipwrecked sailor strike out with his arms in the midst of the sea, though no land is in sight.—Ovid.

Hope is like the sky at night; there is no corner so dark but that a persevering eye will discover a star.

—Octave Feuillet.

HAS MONSTER

Loch Ness, second largest lake in Scotland, is reputed to be inhabited by a "monster" resembling the old-time sea serpents.

Canadian Fashion

Beatrice Pines uses printed cotton for a summer costume with many moods. The strapless suit features allover shirring while the full skirt is shirred from waist to hipline.

Quick Canadian Quiz

1. What is Canada's most southerly point?
2. Personal income tax accounts for what proportion of Ottawa's revenue?
3. Do more Canadians live in the cities and towns or in the country?
4. What noted author became Governor-General of Canada?
5. What east coast island other than P.E.I. and Newfoundland was once a separate province?

ANSWERS: 5. Cape Breton Island. 3. About 55 per cent. in urban communities. 1. Middle Island, Ont., in Lake Erie. 4. Lord Tweedsmuir (John Buchan). 2. About one dollar out of six.

(Material supplied by the editors of Quick Canadian Facts, the handbook of facts about Canada.)

VEAL DRUMSTICKS

One and a half lbs. veal steak, cut ¼ inch thick, 1 recipe stuffing, ¼ cup flour, 1 tsp. salt, ¼ tsp. pepper, 2 tbsp. fat, 1 cup water.

Cut veal steak into 6-inch squares. Pound meat until thin. Place spoonful stuffing in centre of each square; roll and secure with toothpicks. Insert wooden skewers. Roll meat in seasoned flour. Brown in hot fat. Add water; cover and simmer over low heat about 45 minutes, or

GARDEN NOTES

Spacing Between Plants Important For Healthy And Well-Developed Products

Give Them Room

Even where there is lots of room to spare the average person is liable to crowd his planting. This is true just as much with rows of vegetables as it is with trees. Seeds and seedlings are usually such tiny, little things that it is hard to realize the extent of the resulting growth.

A rough rule is to allow as much space between the plants, trees, shrubbery or annuals as these things will be high at maturity. Now with a big affair like a maple, elm or spruce tree, that means at least 40-50 feet apart, though the full space may not be required for years. Going to the other end of the scale, tiny alyssum would need an inch or so between plants, carrots about 4 inches, stalked tomatoes 18 inches, gladioli about a foot.

This spacing is important. It gives the plants a chance to develop. If crowded together trees, shrubs, flow-

ers and vegetables will be spindly, with the growth weak and a prey to the first storm. Flowers, as well as vegetables, will be poorly developed. With a little elbow room, too, cultivation will be easier.

With vegetables, of course, there will be the space between the rows also to consider. It is a great mistake to have this less than 12 inches for even the tiniest. If less than this one will have great difficulty in cultivating, and cultivating regularly is one of the most important jobs in the garden.

Soil Must Be Fed

No matter how naturally rich a garden soil is, it will benefit from some applications of fertilizer.

The gardener should understand that he is using his soil very intensively, very much more intensively in fact than does the farmer. In a small plot of ground a great many things are being grown and the same plot of soil is used over and over again. Secondly, the fertilizer is being used for several purposes, not just to feed particular vegetables, flowers or shrubbery but to get bigger and better blooms, earlier vegetables, and in some cases to bring on growth or maturity quickly before frost or to get ahead of disease or insects.

The best general fertilizer, of course, is well rotted manure but that is a pretty rare commodity in most parts of Canada. A good substitute and an excellent thing for speeding growth is chemical fertilizer, but it must be used according to directions. Rotted humus or compost will also help build up soil and also digging in a "cover" crop of clover, rye, oats, or just plain weeds.

Manitoba Gets Highway Assent

OTTAWA.—Assurance that Manitoba will get enough steel and other materials to proceed with its part of the trans-Canada highway programme was received by Hon. William Morton, minister of public works, when he conferred here with Hon. R. H. Winters, federal resources minister recently.

Mr. Morton was in Ottawa seeking clarification on the availability of steel and other materials for Manitoba bridges and major highway work.

The provincial government will have sufficient steel to complete the unfinished 20 miles of concrete highway on No. 75 from Morris to the United States border. This will provide an all-concrete highway from Winnipeg to Emerson, Mr. Morton pointed out in an interview.

On the question of steel for building bridges the picture was not so clear, he said, but he hoped before returning to Winnipeg to have a definite indication of the amount available.

SMILE OF THE WEEK

A Scot taking part in a novice's boxing match, was hammering his opponent in fine style.

The bell rang, but the Scot paid no attention. The referee, tapping him on the shoulder, shouted "Time". "Oot o' my way, mon", shouted the Scot, still punching his opponent. "Just when I'm winning you ask me the time. Ask somebody else!"

Helpful Hints

To insure a perfect brew, a coffee pot should be scrubbed with soap and water and rinsed thoroughly each time it is used.

Split ends of a bird-cage perch can be repaired by slipping pencil tip erasers over them. Notch the heads of the erasers to hold the perch securely on the bars.

"Real" silks, which are staging a come-back this season, should be washed by hand. Immerse the garment in tepid water stuffed up liberally with soapsuds. Wash and rinse quickly and then gently press out water. Absorb remaining moisture in a towel until damp-dry enough to iron.

To rid a place of ants, wet an old sponge and sprinkle it with sugar. The ants will crawl into the sponge, which can then be plunged into boiling water.

Pteropods are tiny, undersea animals which leave their remains on the ocean floor.

OUR COMPLETE SHORT STORY—

RE-ENACTED : No One Knew That Parrysh Blaine Had Refused To Help Christian When Slipping From A Crumbling Edge.

By Louis Arthur Cunningham

PARRYSH BLAINE let the sand trickle over his knees as it fell in little cataracts from his hands. The beach was warm from the sun of mid-afternoon. Blue waves dimpled and broke white at his feet. Purposely he had come to this deserted cove along the beach at Sorrento. He wanted solitude.

For six months, since the tragic death of Christian Bieler, his niece and ward, Blaine had kept himself surrounded by friends. He had haunted the places of light and movement where he had no time to think. At first the white, terrified face of Christian had haunted him. . . . At the banquet table, the ball, the club; but his friends, with jest and laugh, drove it away.

Christian Bieler had fallen from the cliffs at Smedport. Perhaps mercifully, it had been given her to die before she reached the rocks five hundred feet below. No one knew that Parrysh Blaine had refused to help her when her frail fingers were slipping, slipping from the crumbling edge. Callously he had watched her, his lips twisted with the force of the awful temptation he yielded to so readily. Her cries, her pleading, he did not heed. They were soon stilled.

Accident. The police, the friends of Christian and Parrysh Blaine never questioned the nature of her death. There was no motive to awaken suspicion. Blaine and his ward had been as intimate, seemingly, as father and daughter. They often strolled along the path by the cliff edge. Blaine's explanation was straightforward; a windy day, a deceptive spot where the grass grew high over the edge, a gust that lifted Christian's hat, a lunge after it . . . and she was over. It was a fair explanation; who would question it in the face of her guardian's grief, fought down with tortured effort?

The large estate left by Christian was added to Blaine's fortune; he was her only relative. Of course, folks said, her money could mean little to him. For years he had practiced law successfully; his own holdings must be great. But they did not know the truth. Blaine's ways were secret and profound. Gambling was a passion and, of late, when his own money was wasted, he dipped deeply into Christian's and lost a good part. He knew the time for an accounting was not remote, and even though he were spared the ignominy of prison he would certainly be deprived of the means with which to gamble.

And Blaine was a man who loved life; those of its pleasures which one can enjoy best with the sesame of wealth. Almost dispassionately he had planned to remove from his path the young girl, a frail obstacle easy to overcome. A push, sudden and violent, had sent her over the edge. Her clutching fingers had snatched at the grass and shrubs, her birdlike strength had held her long enough for him, if he willed, to have saved her. But he had smiled . . . a twisted smile.

When the days of well-feigned lamenting were over Blaine went far away. In Paris, Monte Carlo, Biarritz . . . along the Riviera he lost himself to any conscience that might have accused him. He picked up gay companions. He shunned the gloomy aspects of life and dreaded to look upon violence as a man threatened with blindness fears to read in obscure light.

Though successful in putting down the memory that would have driven some men to insanity, he felt the dominating power of the crime upon his life. He fled, though he did not know it, from a spectre. He lost himself down alleys of laughter, trying to forget the last picture of her face.

He guarded another secret, confided to him by a surgeon in Milan: his heart was weak. Undisturbed by

shock, it might function for years. But he must be careful.

He was careful. More tenaciously now that his own grip was weakening, he clung to life. Lying on the sands at Sorrento, warm, filled with a sense of well-being, able to go alone and free from remorse, he loved life. Oh, yes, he would take care. He would live in tranquil surroundings such as these. What could touch him?

He smiled. Idly he lifted his eyes from a tall cone of sand he had built, and gazed around. Sea, sky and behind him the rugged cliff. No sign of life, unless that bit of white, the sail of a fishing boat or that daub of black from a steamer's funnel, could be called life. Even the birds that lived in the rocky eeries were still. How secure he felt. It would be always so. Yet he hungered for a touch of life. One alone is easy prey to fear. Perhaps with his binoculars . . .

The fishing boat, the steamer, were too far away for even the powerful glasses. Blaine squirmed around and trained them on the cliffs. Ah, there was someone . . .!

Blaine's shoulders stiffened. The Binoculars seemed part of him; yet, could he have done so, he would have dashed them away. Vividly, as on a screen, he saw a picture framed in the lenses. High up on the cliff were a man and a girl. The girl, young, dressed in white, with a bonnet of straw hanging by a ribbon from her arm . . . the girl was strangely like Christian. The man was older. She was struggling in his arms . . . Christian had not fought like that. It was not easy to force this one over. Back and forth, back and forth . . . Would it ever end! There . . . she was over. Like Christian, she managed to twine her fingers in the grass and cling desperately. But she would slip. She must slip. Hideous act . . . the man placed his heel upon her hand and crushed it with all his weight.

A few days later the home papers carried a short item: Parrysh Blaine, well-known lawyer, was found dead on the sands at Sorrento. Death was caused by disease of the heart. The body was discovered by some motion-picture actors who had been shooting a scene of the cliffs during the afternoon.

Minnedosa—Friday, June 15th.
Neepawa—Monday, June 18th.
Franklin—Tuesday, June 19th.
Keyes—Wednesday, June 20th.
Arden—Thursday, June 21st.
Gladstone—Friday, June 22nd.
Macdonald—Monday, June 25th.
Westbourne—Tuesday, June 26th.
Marquette—Wednesday, June 27th.
Poplar Point—Thursday, June 28th.
Rosser—Friday, June 29th.
Meadows—Saturday, June 30th.

B.C. HAS ITS FIRST MALE NURSE

VANCOUVER.—From now on, it'll be James Bullen, R.N. Mr. Bullen, 33, graduated as a fully-qualified nurse, first man in British Columbia history to do so.

Along with the 110 girls in his graduating class at St. Paul's school of nursing, he wore white—white slacks and tunic. The girls carried bouquets but he settled for a boutonniere.

"I was in the medical corps during the war and I saw the need for male nurses," he said.

"It's been fun," he said of his three years in training. 2932

Western Briefs :

Drouth Closes Camps

VANCOUVER.—Southwestern British Columbia's record 28-day drouth forced closure of several logging camps.

Tourney Dates Set

LLOYDMINSTER, Sask. — Lloydminster Canadian Legion's third annual baseball tournament will be held here June 5-6. Eight entries will be accepted.

Announce Swimming Dates

VANCOUVER.—The Vancouver Amateur Swimming club announced that the Dominion swimming and diving championships will be held here July 25 to 28.

Farm Earnings High

YORKTON, Sask. — Statistical reports recently issued shows farmers in this district received almost \$100,000,000 in 1950 making Yorkton the centre of one of the richest areas in the west.

Nurses Get Increase

WINNIPEG.—The Manitoba Association of Registered Nurses announced an increase of \$2 a day—from \$7 to \$9—in the service rate of private-duty nurses.

Huge Runway

REGINA. — Work will begin this year on a huge new runway at Regina's airport and it's hoped when the work is completed the city will become a regular stopping point for Trans-Canada Air lines mainline flights.

Lake Named After Soldier

FLIN FLON, Man.—Word was received by Mr. and Mrs. R. M. Locker, that a lake in Saskatchewan has been named for their son Lorne, who died in action overseas in 1943. The lake is situated in Northern Saskatchewan, 60 miles south of Fort du Lac.

To Feel Right — Eat Right

No end of surprises with MAGIC!

PEANUT BUTTER PINWHEEL LOAF

Mix and sift into a bowl, 3 c. once-sifted pastry flour (or 2½ c. once-sifted hard-wheat flour), 5½ tsp. Magic Baking Powder, ¼ tsp. salt. Cut in finely 7 lbs. chilled shortening. Combine ¾ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork. Knead for 10 seconds on lightly-floured board and roll out to ½" thick rectangle, 8½" along one side. Cream together 1 lbs. butter or margarine, ¼ c. peanut butter and ½ c. lightly-packed brown sugar; sprinkle on rolled-out dough. Beginning at an 8½" edge, roll dough up like a jelly roll and place in a greased loaf pan (4½" x 8½"). Bake in a hot oven, 400°, about 45 minutes. Serve hot, cut in thick slices, or cold, cut in thin slices, lightly spread with butter or margarine.

SAVE MONEY ON DECORATING COSTS!

Flite WALL PAINT

A five-pound package makes a gallon of paint ready to use — enough for an average room. Dries odourless in less than 1 hour. Easy to mix and apply. Cleansable finish after 30 days.

Ask your paint dealer for your colour card.

THE EASY WAY TO PAINT IS THE **Wesco** WAY!

OIL MAKES A COUNTRY STRONG

"SURE...I WAS HERE WHEN IT STARTED!"

You can bet Jimmie was on hand when the first Imperial drilling crew turned up at the farm gate. And he's been an untiring fence post superintendent ever since. But that's not all—in his short lifetime he's lived enough years to see the growth of a new major industry.

Less than five years ago Canada's oil producing industry was far from robust. Our oil fields were dwindling and produced only one barrel in every 10 we used.

Today only eight countries in the world are known to have larger oil reserves than Canada. And production this year is expected to meet about one-third of our needs.

Every barrel of this "home grown" crude lessens our dependence on other countries and brings us a step closer to self-sufficiency in oil. With oil increasingly important to our daily life in peace or war, any improvement in security of supply means new security for Jimmie and for all of us.

Canada's newest major industry gives promise of becoming one of her greatest.

IMPERIAL OIL LIMITED
